Re-Delivered SQRs: SRGRDUPD.SQC and SRGGRDDRV.SQR. Re-Delivered ADPCPROG Cobol. Validate Matriculation from AD > SR and be mindful of customizations to Matriculation Processes and Update Scripts/Customizations for ACAD_PROG, ACAD_PLAN, and ACAD_SUBPLAN. |
| 315 | 31 | Student Records | Transcripts | Electronic Transcripts | 11303569 | Electronic Transcripts | TS130  EARNED UNITS IN CRS LINE NOT CORRECT | Use ELEC_CRS_AET.EARN_CREDIT to determine value of Unit Earned. | From Oracle:  Bug in CRS line on outbound transcript.  The column with earned units will reflect units for classes whether enrolled, dropped or attempted. Earned units should only be non-zero if the student has a passing grade in the class.  The delivered EDI App Engine takes the Earned Units for the CRS line directly from the field STDNT_ENRL.UNT_TAKEN, without regard for a passing grade being present. |

| Row # | Bundle | Description | Name | Sub-Component | Report ID | Impacted Functional Area | Subject | Descr | Testing Comments-RMF |
|-------|--------|-------------|------|---------------|-----------|--------------------------|---------|-------|----------------------|
| 316 | 31 | Student Records | Transcripts | Electronic Transcripts | 11307803 | Electronic Transcripts | PSFT 1332860000-GRADE POINTS FOR TRANSFER, TEST AND OTHER CLASSES INCORRECT ON E | Compute for Grade Points instead of using Unit Earned. | From Oracle:  There is a problem with Electronic Transcripts and the EDI outbound file in the CRS line.  The column for Grade Points is not correct for lines pertaining to Transfer, Test and Other credit.  The problem is that in the PS EDI App Engine script, the Grade Points variable is not properly declared and is just carrying forward from the prior line, producing incorrect values. |
| 317 | 31 | Student Records | Transcripts | Electronic Transcripts | 11616317 | Electronic Transcripts | PSFT 1989641000-ENH: ADD THE LX LINE ITEM TO THE FILE | Insert LX record after SUM record. | From Oracle: TS130 outbound process is designed to produce output that may be sent to other institutions.  This can be done by using SPEEDE  but when the output is generated by the Electronic Transcript App Engine, the LX line item as required by SPEEDE, is not created. This prevents SPEEDE from receiving the file. |
| 318 | 31 | Student Records | Transcripts | Electronic Transcripts | 11894654 | Electronic Transcripts | DROPPED CLASSES SHOW ON TS130 TRANSCRIPT | Add checking of enrollment status in select statement. | Enhancement Request. New Feature for CS Bundle #31. |

|---|---|---|---|---|---|---|---|---|---|
| 321 | 31 | Student Records | Transcripts | XMLP Transcripts | 14372910 | XMLP Transcripts | TRANSCRIPT XML FILES NOT DELETED FROM XMLP FOLDER ON APPLICATION SERVER | Modified Transcript process to delete datasource file after report has been created. | From Oracle:  When a transcript is generated from the Request Transcript Report component, the temporary XML files created by the process ar not being deleted and are retained in XMLP folder on the application server. This may lead to a large number of files to accumulate on the file server, eventually reaching the maximum file/directory limit. Once this happens, all XMLP processes will  fail. The file is deleted by a line of code in DisplayReport method in SSR_TRANSCRIPT.Report. OnExecute Application Package Peoplecode. However, this line of code is commented. Uncommenting it resolves the issue:   /* Delete temporary XML file */   rem &objReportUtil.deleteDataXML(); |
| 322 | 31 | Student Records | Veterans Benefits | | 17302248 | Veterans Benefits | ROLLOVER BENEFIT SUMMARY POPULATION SELECTION QUERY REMOVE YELLOW RIBBON COND. | Modified SSR_VB_ROLL_BND view to remove the yellow ribbon check. Modified query in App Class SSR_VB_VETERANS_BENEFIT.SSR_VB_ROLL_BNSUM to pick up all the students irrespective of whether yellow ribbon is checked or not. | From Oracle: The Population Selection query delivered should select all records from the Roll From Term defined.  Currently, the query is just picking up the Yellow Ribbon participants. The Yellow Ribbon check should be removed from the query. |

| 352 | 33 | Student Records | Activity Management | Activity Grading | 17981259 | Activity Management | ROSTER CONFIRMATION | Added ability to Confirm activities in the Activity Manager WorkCenter. | New feature for CS Bundle #33. |
| 353 | 33 | Student Records | Activity Management | Activity Scheduling | 17608967 | Activity Management | PEAM_04: AM ORG & MANAGE - EXAM SECTION INCLUSIONS | Added Inclusions for Exam Sections needed to support calculation and | New feature for CS Bundle #33. |
| 354 | 33 | Student Records | Activity Management | Activity Scheduling | 17981355 | Activity Management | ADD BATCH PROCESSES FOR AM & SM FOR STATUS FIELDS | Created a process to update Activity and Exam Section Statuses. | New feature for CS Bundle #33. |
| 355 | 33 | Student Records | Class Search | | 17258076 | Class Search, Program Enrollment, Core Enrollment | INCORPORATION OF CAF BASED CLASS SECTION MAPPING INTO CLASS SEARCH | Added functionality to display classes by common attributes through use of filters. Use of filters are controlled | New feature for CS Bundle #33. |
| 356 | 33 | Student Records | Class Search | | 17549343 | Class Search, Program Enrollment, Core Enrollment | CLASS SEARCH PAGE NOT RENDERING PROPERLY IN IE10 | Modified page SSR_CLSRCH_ENTRY to align subject fields with other criteria fields. | New feature for CS Bundle #33. |
| 357 | 33 | Student Records | Courses and Classes | Schedule of Classes | 16862081 | Schedule of Classes | INSTRUCTOR NAME DISPLAYS AS INSTRUCTOR NOT AVAILABLE ON CLASS SCHEDULE MEETINGS | Added information icon to indicate instructors which may are not available for a class section. | From CS Bundle #29. From Oracle: Changes in the CLASS_INSTR.EMPLID RowInit Pcode with Bundle 29 are causing the instructor name to no longer be displayed as the code considers these already existing instructors to be invalid. Problem is due to the Academic Org being used in the vetting process - it is coming from the course catalog and not the actual class table which can have a different org from the catalog default. This effects colleges whose course catalog offering academic organization differs from what is on the class schedule. |

| Row # | Bundle | Description | Name | Sub-Component | Report ID | Impacted Functional Area | Subject | Descr | Testing Comments-RMF |
|---|---|---|---|---|---|---|---|---|---|
| 358 | 33 | Student Records | Courses and Classes | Schedule of Classes | 17476717 | Schedule of Classes | INSTRUCTOR PROMPT STILL PULLS INSTRUCTORS NOT VALID FOR THE ORG AFTER BUNDLE #29 | Replaced multiple views used to prompt instructors with single dynamic view INSTR_ORG_DVW where the sqltext is generated at runtime to based on academic organization setup. | Re-Delivered and Consolidated Instructor View: INSTR_ORG_DVW. From CS Bundle #29. When prompting off of the instructor/advisor table to assign instructors on the Schedule of Classes, instructors who do not have the academic organization of the course on the max effective dated row of the instructor/advisor table are still returned from the search and can be assigned to teach the class. |
| 359 | 33 | Student Records | Courses and Classes | Schedule of Classes | 17516712 | Schedule of Classes | PERFORMANCE ISSUES WITH INSTRUCTOR LOOK UP SINCE BUNDLE #29 | Fixed as part of Bug 17476717. | Refer to Bug ID#:17476717 (above). Corrected with consolidated instructor view table. |
| 360 | 33 | Student Records | Enrollment | Appointments | 13337843 | Enrollment | APPOINTMENT LIMITS NOT BEING HONORED | Provide an option such that appointment limit checking can work in two ways: (1) Limit applies by session (as current), and (2) Limit applies across all sessions | From Oracle: Appointment limits are not being honored when enrolling in different sessions. The student is able to enroll in units over the appointment limit when enrolling in classes in different sessions. The Regular Non Standard session is set up to point to the Regular term. Validate Appointment Limits are being enforced. |
| 361 | 33 | Student Records | Enrollment | Block Enrollment | 18117862 | Enrollment | ADD POPULATION SELECTION TO STUDENT BLOCK COMPONENT | Enabled the Population Selection feature on the Create Student Block | New feature for CS Bundle #33. |

| Row # | Bundle | Description | Name | Sub-Component | Report ID | Impacted Functional Area | Subject | Descr | Testing Comments-RMF |
|---|---|---|---|---|---|---|---|---|---|
| 362 | 33 | Student Records | Enrollment | Enrollment. | 11128078 | Enrollment | ENROLLMENT REQUEST ALLOWS USERS TO ADD CLASSES WITHOUT A GRADING BASIS | Modified ENRL_REQ_DETAIL.GRADING_BASIS_ENRL.SaveEdit to make Enrollment Request edits for grading basis the same way as quick enroll. | Re-Delivered Enrollment Request PeopleCode. From Oracle: When a user adds a class through enrollment request, that user can delete the default grading basis and enroll without a grading basis. On the student record, the grading scheme has been assigned to the student record rather than a grading basis. End users who use the web self service find the problem when they cannot add a grade to the grade roster. Validate Grading Basis is now enforced when enrolling via Enrollment Request. |
| 363 | 33 | Student Records | Faculty and Advisors | Schedule of Classes | 13930954 | Instructor Schedule, Faculty Center, Faculty Search, Student Center | INSTR_CLASS_VW NOT DISPLAYING CORRECTLY FOR TURKISH LANGUAGE | Modified INSTR_CLASS_VW, CLASS_TBL_VW1, and Self Service pages to use course description rather than class description. | For Foreign Language Installation (Turkish). Validate new views display correct language and description. |
| 364 | 33 | Student Records | Program Enrollment | | 17774586 | Program Enrollment | DEFAULT RESULT SCALE APPLIED TO ALL RESULT VALUE FIELD TYPES INCORRECTLY | In the peoplecode for app package SSR_PROG_ENRL:Components:SSR_STDNT_APT, methods SSR_APT_RSLT__SSR_RSLT_TYPE__Fi | Re-Delivered AppPackage SSR_PROG_ENRL. ValidateType Values. |
| 365 | 33 | Student Records | Program Enrollment | | 17791052 | Program Enrollment | APT COMPONENT - ONLY LAST SELECTION ADDED FROM A COURSEGROUP | In app package peoplecode SSR_PROG_ENRL:Components:SSR_STDNT_APT the code under method SSR_APT_WRK__SSR_SELECT__FieldEdit was commented out. | Re-Delivered AppPackage SSR_PROG_ENRL. | 386 | 33 | Student Records | Research Tracking | Student Career | 18123639 | Student Records: Student Career | STUDENT CAREER NUMBER ALWAYS DEFAULTS TO '0' ON CANDIDATE RECORD | Fixed Student Career page to pass the correct career number when creating the research candidate record. Modified the Candidate Management Override page to allow correction of the career number. | From Oracle: Student Career Number always defaults to '0' on Candidate Record when created by making a change on the Program/Plan Stack. On the ACAD_PLAN component SavePreChange code, a method called Component_PreChange is called to generate Research Tracking records. The 4th bind value should be the student career number, but is hard coded to always be 0. This results in error messages when accessing the ResearchTracking components as the system cannot find required values from the correct ACAD_PROG records. This also means that PS queries cannot find results as the keys between candidate management and the program plan stack do not match. Validate Career Nbr is passed when creating Candidate Record. |

| 404 | 34 | Student Records | Enrollment | Enrollment. | | | | | AppEngine. Validate Class Roll. From Oracle:  Customer has setup their grade scheme table with custom translate values for the OPT grading basis. This has been causing problems for them when they do Class Roll and then Mass Enrollment after changing units, etc. on class associations. The issue occurs when a campus has used custom translate values for their elective grading basis, no matter what the career is and no matter whether or not the student has enrolled in classes that cross-careers.  When Class Roll is used to update the STDNT_ENRL record after changes have been made to class associations, using the Class Roll feature, the GRADING_BASIS_ENRL value on PS_STDNT_ENRL is changed from what the student originally chose, to the actual grade basis on the class.  This does not |

|---|---|---|---|---|---|---|---|---|---|
| 405 | 34 | Student Records | Grading | | 11829072 | Grading | IN THE GRADE_ROSTER COMPONENT, THE DROP-DOWN GRADES DISPLAYED DO NOT MATCH BASIS | Added code to the FUNCLIB_SR.GRADE_ROSTER FieldFormula that will assign the values of grading basis of the Enrollment table to the Grade Roster Admin record. Having the right grading basis will produce correct grades on the prompt. Also added code to the FUNCLIB_SR.GRADE_ROSTER FieldFormula peoplecode for the Self-Service side that will assign the values of grading basis of the STDNT_ENRL table to the GRADE_ROSTER record before picking up the values of the course grade input. | From Oracle: In the Grade_Roster Component, the drop-down grades are generated from the PS_Grade_Roster.Grading_Basis_Enrl instead of the PS_Stdnt_Enrl.Grading_Basis_Enrl value. This causes a problem when the grading basis for the student is changed after the grade roster has been created. The end result is that the student gets assigned a grade that is not in the list of grades in the grade basis found on the ps_stdnt_enrl record. However, the SS_GRADE_RSTR component displays the correct grades because it uses the PS_Stdnt_Enrl.Grading_Basis_Enrl to get the drop-down grades. |
| 406 | 34 | Student Records | Grading | | 18979428 | Grading, Student Milestones | GRADES INCORRECTLY ASSIGNED TO STUDENTS WHEN ADDED AFTER SORTING THE ROSTER | Get a reference to the TopRowNumber before the grid is refreshed and sorted in the save, grade roster type change, milestone change, and approval status change routines and then reapply the remembered TopRowNumber right after. When switching between grade roster types or milestones while the grade or milestone roster has a user sort in effect, sort the grid again to reapply the original sort by Name before setting the first user sorted row as the TopRowNumber. | From Oracle: The Grade Roster incorrectly assigns grades to students when the roster is sorted and then grade are added. This happens when there are more than 20 students in the roster and there are multiple pages. At a time, 20 rows are displayed, so when the roster is sorted and grades entered on say row 25, which is on page 2. The grade is actually assigned to the student on line 5 and 25 when the grade is saved. |
| 407 | 34 | Student Records | Graduation Processing | | 14152914 | Graduation Processing | REQUEST THAT SELF SERVICE GRAD STATUS BE DISPLAYED AFTER DEGREE IS AWARDED. | Created record view SSS_GRAD_SRCH to display Active and Completed programs. | 434 | 34 | Student Records | Student Milestones | | 18841628 | Student Milestones | PREVENT USERS WITH ALL INQUIRY PERMISSION ONLY FROM ADDING NEW EFFECTIVE DATE | Added peoplecode that will hide/disable add milestone and milestone copy button if user has an ALL INQUIRY permission only. | Milestone Security Update. Validate users with ALL/INQUIRY access from adding or copying milestones. |
| 435 | 34 | Student Records | Student Programs and Plans | | 17842740 | Student Programs and Plans | STUDENT ATTRIBUTE LOOK UP USES INSTITUTION FROM USER DEFAULTS NOT STUDENT RECORD | The FieldDefault peoplecode for STDNT_ATTR_DTL.INSTITUTION was changed to assign the institution value from the student's program record. | From Oracle: The Student Attribute look up prompt uses a default for Institution from the User Defaults rather than the student's record. This is an issue for a multi-institution environment where the look up fetches incorrect values. |
| 436 | 34 | Student Records | Term Activation | | 11598208 | Term Activation | USERS ARE ALLOWED TO MODIFY TERM OF STUDENT TERM ACTIVATION RECORD | For record STDNT_CAR_TERM, field edit peoplecode was added to INSTITUTION and STRM to prevent changes to these fields if any STDNT_ENRL records are found to match the original values. If that edit is passed, another test is done to make sure that the new value for the INSTITUTION or STRM will not conflict with an existing Career / Institution / Term row. | Re-Delivered Record PeopleCode on STDNT_CAR_TERM. From Oracle: Changing the term of the student term activation record has been allowed even there is an enrollment record. This is only happened when the credit unit is zero for the course. Validate Users can no longer update INSTITUTION and STRM for Activation Records that have data matching STDNT_ENRL and does not conflict with existing Career/Institution/Term rows. |
| 437 | 34 | Student Records | Transcripts | XMLP Transcripts | 11808975 | Transcripts | EXTERNAL COURSE NOT DISPLAYING ON TRANSCRIPT IF TERM YR & EXTERNL TERM ARE BLANK | Modify subtemplate SSR_TSRSLT_STMPLT. Create a new condition to handle Manual Source type data and exclude Term Year if not shown | From Oracle: On Course Credits - Manual if the term year and external term fields, which are not required, are left blank, the external course does not display on the transcript if the transcript type is set to print only the external course detail. |

|---|---|---|---|---|---|---|---|---|---|
| 438 | 34 | Student Records | Transcripts | XMLP Transcripts | 14045223 | Transcripts | XML TRANSCRIPT SSR_TSC_LIB.TESTSCOR.STEP30 ERROR WITH TEST SCORE DATA | Add LS_DATA_SOURCE as key to result table SSR_TSRSLT_TST | From Oracle: Transcript Request fails with a sql error when requesting a transcript for a student that has multiple test results for the same testID but different sources. |
| 439 | 34 | Student Records | Transcripts | XMLP Transcripts | 16441906 | Transcripts | THESIS TITLES FROM GRADUATE RESEARCH MANAGEMENT NEED TO APPEAR ON TRANSCRIPTS | Add setup in Transcript Type to display Thesis and Academic Project in either Transcript header or trailer. Create new result table to store Thesis/project data. Add new result table to file layout | New Feature for CS Bundle #34 |
| 440 | 34 | Student Records | Transcripts | XMLP Transcripts | 17698195 | Transcripts | TRANSCRIPT TEMPLATE USED IN VIEW ALL REQUESTED REPORTS IS ALWAYS DELIVERED REPOR | The incorrect institution and transcript type variables are used as parameters when executing the method to display the report. Modified peoplecode SSS_TSRQST_UNOFF.DERIVED_SSTSRPT.GO_PB.FieldChange to use the correct values. | From Oracle: If a custom report definition and template are being used and are assigned to the transcript type, when viewing the transcript report from Student Center - View Unofficial Transcripts - View All Requested Reports in Self Service, the template used is not the template that is associated with the transcript type, but is always the default template associated with the delivered SSR_TSRPT Report Definition. This is because the Report Definition is hardcoded in SetReportDefn method. However, the correct Report Definition and Template are used when the report is generated and viewed, because the report definition and template gets assigned at runtime. |

|---|---|---|---|---|---|---|---|---|---|
| 441 | 34 | Student Records | Transcripts | XMLP Transcripts | 18204366 | Transcripts | XML TRANSCRIPTS PRINT INCORRECT SUBPLAN | Modified AE peoplecode SSR_TSC_LIB.ProgAll2 to print plan and subplans according to transcript type setup. | From Oracle: When a new effective-dated row is inserted on a student's Program/Plan stack that changes only the subplan value, the new subplan does not display on the XML Transcript. The original subplan value continues to be displayed instead. |
| 442 | 34 | Student Records | Veterans Benefits | | 17754292 | Veterans Benefit | PAYMENT ITEM TYPES NOT PULLED INTO VETERAN WORKSHEET OR PAYMENT HISTORY | Modified View SQL for SSR_VB_FEDPAYVW, SSR_VB_FYRPAYVW, and SSR_STAPAYVW to fix the issue. | From Oracle: After following the setup provided in the documentation delivered in Bundle #30 for the Veterans Benefit Reporting functionality, the payments are not displaying on the Veterans Payment History page. |
| 443 | 34 | Student Records | Veterans Benefits | | 17997281 | Veterans Benefit | ROLLOVER BENEFIT SUMMARY AE PROCESS SSR_VBROLLBN NOT OBEYING POP SELECT | Modified Application Package(SSR_VB_VETERANS_BENEFIT.SSR_VB_ROLL_BNSUMM) peoplecode to fix the issue. | Re-Delivered SSR_VBROLLBN AppEngine. From Oracle: The Rollover Benefit Summary App Engine program is ignoring pop select query and rolling over all EMPLIDs that exist in the Roll From Term and creating Benefits in the Roll To Term. |

|---|---|---|---|---|---|---|---|---|---|
| 444 | 34 | Student Records | Veterans Benefits | | 18460853 | Veterans Benefit | VETERANS BENEFIT TUITION WORKSHEET NOT DISPLAYING ALL CHARGES | Added ITEM_NBR as a key to the records SSR_VB_TUI_OVR and SSR_VB_TUI_OVRW to fix the issue. | Key Field ITEM_NBR Added to SSR_VB_TUI_OVR and SSR_VB_TUI_OVRW. From Oracle:  Veterans Benefits Tuition Worksheet does not seem to show posted late fee charge even after running the Update Tuition Worksheet process and tuition calc process for the student. However, another late fee charge on the student account shows up correctly. Seems like the issue is caused because ITEM_NBR is not key in SSR_VB_TUI_OVR record. Validate Reports and 3rd Party extracts and Joins. |
